LinkedIn: <https://www.linkedin.com/in/jared-gentry-48923b113/>

### **PROFESSIONAL SUMMARY**

Detail-oriented Full Stack Software Engineer with a strong background in developing modern web applications, specializing in front end development with expertise in React, Next.js, and TypeScript. Experience in building scalable, high-performance user interfaces while also proficient in full stack development, including back end integrations with FastAPI, WebSockets, and Supabase. Passionate about delivering intuitive, performant, and user-centric solutions.

### **SKILLS**

- Programming Languages: JavaScript, TypeScript, Python, Java
- Web Technologies: React, Next.js, Node.js, HTML, CSS, Tailwind CSS, FastAPI, Supabase, WebSockets, Chrome Extensions
- Testing & QA: Jest, Cypress, React Testing Library, TDD (Test-driven Development), e2e (end-to-end) testing
- Cloud Platforms: AWS, Vercel, Platform One, Linode VPS, GitHub
- DevOps Tools: Docker, Kubernetes, Git, CI/CD pipelines
- Database Systems: MongoDB, PostgreSQL
- Soft Skills: Leadership, Communication, Problem-solving, Team Collaboration

### **WORK EXPERIENCE**

FTLOS

Full Stack Software Engineer

Remote | 05/2025 - Present

- Architected a full stack sports-focused social networking web application for a client
- Built a responsive single-page application (SPA) using React, Vite, and Tailwind CSS
- Developed a modular Express backend with Supabase Auth and file storage integration
- Facilitated user connections through shared ratings of teams, athletes, and sports
- Deployed the application to a Linode VPS for global accessibility and scalability

ReThink

Front End Software Engineer

Remote | 07/2024 - 01/2025

- Led front end development for a B2B AI-powered construction software application.
- Built a highly interactive UI using React, Next.js, Tailwind CSS, and Shadcn.
- Collaborated with backend engineers to integrate AI-driven features and optimize API performance in a fast-paced startup environment.

KBR

Senior Full Stack Software Engineer

Remote | 02/2021 - 02/2024

- Converted a TypeScript React SPA to a full-stack Next.js application and deployed it using Docker, Kubernetes, and Helm.
- Developed a BFF application to connect Next.js frontend with main microservice using Kafka and WebSockets.
- Worked remotely for Space Camp, a software factory for the Space Force, with a team developing real-time web applications for Space Force organizations.
- Practiced Extreme Programming principles including pair programming and TDD while building a React, TypeScript frontend app and NestJS backend server.
- Implemented near pixel-perfect designs using Tailwind CSS and Material-UI.
- Maintained over 98% code coverage in both the frontend and backend repos using Jest, React Testing Library, and Cypress.

Naval Information Warfare Center (NIWC)

Software Engineer

Boston, MA, USA | 06/2019 - 02/2021

- Worked at Kessel Run with a team developing a suite of modern web apps for Air Force maintainers.
- Practiced Extreme Programming principles while building a React frontend app and Java Spring Boot backend microservice.
- Reduced Cypress testing time by 50% using stubbed out API calls.
- Utilized Redux on the frontend to manage state and handle multiple API calls to other microservices.

## **EDUCATION**

University of South Carolina

Master of Science in Computer Science

08/2017 - 05/2019

GPA: 4.0

Clemson University

Bachelor of Science in Bioengineering

08/2012 - 05/2016

GPA: 3.86

## **PROJECTS**

Gistr

Gistr LLC | 2025

- Built a SaaS business that enables users to quickly summarize web articles for later reading.
- Developed and deployed a full-stack Next.js application with a focus on performance and usability.
- Designed, developed, and launched a companion Chrome extension to enhance user experience and streamline article summarization.
